TECHNICAL PROJECT

ComicVerse web app

Developed ComicVerse web app using Node.js, MongoDB, and API integration. Enabled Google login/logout for secure user authentication, allowed admin book uploads, and used MongoDB for user data storage.

UniCRUD: Unified CRUD Operations Management System.

Built UniCRUD: a web app with Node.js and MongoDB for managing user data and photos, featuring user registration and image handling with a user-friendly interface. Leveraged MongoDB for efficient data storage and retrieval.

Real-Time Chat Application

Created a dynamic and scalable Real-Time Chat Application using Node.js and Socket.IO, enabling one-on-one and group conversations with real-time communication features.
